Description

Non-woven discs have three components: strong synthetic fibre mesh, quality abrasive and a smear-resistant adhesive. Rapid Blend discs have a unitised construction with varying weave, from open to tighter, for deburring to finishing applications. Can be used in sequence with fibre and flap discs to blend and impart a good finish in one or two operations.

Features & Benefits

Combination of high-performance grain and unitised construction means finishing time is reduced and part quality is increased , For light weld bead and weld splatter removal, heavy deburring and finishing applications

2 in 1 action: can cut like an 80 grit flap disc and finishes similar to a Rapid Blend (NEX 2SF) disc , Thick nylon web resists loading, shedding and provides long product life

2-in-1 action; can cut like an 80 grit flap disc and finish like a finishing disc , High-performance engineered grain provides aggressive, fast stock removal, reduced cycle times and increased part quality

The undersized backing plate means the disc can be used for longer before being replaced, reducing total abrasive cost , Twice the wheel life of conventional unified wheels, with minimal shedding

Can be used in place of, or in sequence with, fibre and flap discs for improved part quality
