ESAB Rogue EM 180 is an inverter-based **MIG/MAG and MMA** welding system designed to address all your welding project needs, from light fabrication to repair and maintenance. The system features industrial-grade arc performance and full featured controls that allow the welder to fine tune arc characteristics based on the material they are welding.

With a weight of only 16.2 kg, 230V single-phase input and compatibility with 10 kVA generators, this system provides maximum flexibility and portability, both in the shop and in the field.

- Large 14 Segment Display – instantaneous feedback for both voltage and wire feed speed for clear viewing
- Synergic Weld Programs – full range of welding parameters, 0.5 – 8.0 mm with single knob control
- Power Factor Correction (PFC) – ensures a stable arc, resistant to power fluctuations even while working on long extension cables up to 100 m
- Unique rugged industrial design – supporting multiple lift points and cable management
- Arc Dynamics – fine tune arc characteristics for a crisp/stiff arc for carbon steel or a smooth/soft arc for stainless steel
- Energy Save Mode – after 2 minutes of inactivity the unit will enter this state to reduce power consumption
- IP23S rated for indoor/outdoor use
